OVERVIEW
Terol is a range of superior quality, mineral based decorative renders designed for long-life protection of exterior facades and primarily used for finishing Terraco EIFS systems where it is top coated with Terracoat Stain. Terol is available in a range of decorative finishes and in a series of different grain sizes.

PROPERTIES
Terol is formulated using a mixture of crushed and precisely graded laminar, inert extenders, special cements, limes and additives. This gives superior weather and pollution-resistant properties to the material, which has a life expectancy of more than 10 years, when applied correctly.

Decor
Terol Decor is a scratch finish coating, which is applied by steel trowel and patterned with a plastic trowel. It is available in 2mm and 3mm grain size.

Granule
Terol Granule is a high build, trowel applied coating, giving an even attractive granular finish. It is available in 1mm and 2mm grain sizes.

Sahara
Terol Sahara is a high build, trowel applied coating, giving a filled granular appearance. It is available in 1mm and 2mm grain sizes.

Coarse
Terol Coarse is a high build, coarse textured render, applied by spray or trowel.

Smooth
Terol Smooth is a low build, spray applied, even textured finish.

AREA OF USE
Terol is primarily designed for exterior facades/surfaces of concrete, cement rendering, lightweight concrete, and fairfaced brickwork/blockwork, but is also usable on interior surfaces. Terol is ideal as a finish for Terraco EIFS (Exterior Insulating Finishing System).

PREPARATION OF SURFACE
Ensure all dust, dirt and foreign matter are brushed and scraped away. Also ensure surface is solid, free from salts, oil, grease and ridges. Protect all adjacent surfaces not to be coated. All surface defects should be repaired prior to application of Terol with Terramix/Styrobond DP.

MIXING PROPORTIONS
Terol is delivered in powder form and simply needs mixing with water using a high-speed mixer for approximately 1 minute, or a slow mixer for 5 minutes. For small quantities, mixing can be carried out with an agitator driven by a power drill.

APPLICATION & CLEANING OF TOOLS
Apply by trowel to a level granular finish. Do not apply moisture to trowel as this may cause discolouration.

Clean tools and equipment with water after use.

CURING
Allow the surface to air cure for 72 hours.

HEALTH & SAFETY
Avoid prolonged contact with eyes and skin. For detailed information refer to relevant material safety data sheet.

PACKAGING & STORAGE
Product is supplied in 25kg plastic lined paper bags.

Store containers in a clean dry area protected from direct sunlight and extreme heat and cold. Unopened containers can be stored for 6 months. Use oldest material first.

TERRACO offers a comprehensive range of products and services for most concrete and finishing needs. Please contact the TERRACO Technical Service Department or your local TERRACO agent for further information, samples, demonstrations and instructor services. The information given in this leaflet is based upon laboratory research, as well as extensive field work and application. All products are sold subject to standard conditions of sale which are available on request. This information is based on TERRACO’s present state of knowledge and is intended to provide general information on TERRACO’s products and their methods of use. The prospective user is recommended to determine the suitability of TERRACO’s suggestions and products before adopting them on a commercial scale.
