OVERVIEW

TERRACO Sprayplaster Basecoat is an acrylic based, ready to use compounds of inert filler materials, for use on all common types of interior building surfaces. It gives a high quality surface for painting or other finishes. TERRACO Sprayplaster Basecoat is suitable for both precast and conventional buildings. It can be applied directly to either new or old solid surfaces of pre-cast concrete, aerated concrete, sand/cement, fairfaced and level brickwork, etc.

PROPERTIES

TERRACO Sprayplaster Basecoat is a ready-mixed compound formulated from a selected blend of acrylic polymers and precisely graded fillers. The products are:
- Easy to use
- Do not flake off
- Have high adhesion power
- Have high coverage
- Quick drying
- Vapour permeable

AREA OF USE

TERRACO Sprayplaster Basecoat is suitable for use on all types of construction substrates as a basecoat to level and rectify irregularities up to 10 mm thickness. It can be modified with Sprayplaster CM to give a harder, water resistant substrate. When modified, the plaster requires curing for up to 72 hours after application. It is suitable for both pre-cast and conventional buildings and can be applied directly to either new or old solid surfaces of pre-cast concrete, aerated concrete, sand/cement, fairfaced and level brickwork, etc.

APPLICATION & CLEANING OF TOOLS

TERRACO Sprayplaster Basecoat is ready for use, but can be diluted with 2-3 % water if required. Patch and repair uneven/damaged surfaces. Spray the first coat and level with steel edged spatula. Excess material on the spatula should be returned to the machine. If required, apply a second coat of Sprayplaster Basecoat. Finish the surface with 1 or 2 coats of Sprayplaster Finishcoat. Clean tools and equipment with water after use.

HEALTH & SAFETY

Avoid prolonged contact with eyes and skin. For detailed information refer to relevant material safety data sheet.

PACKAGING & STORAGE

Product is supplied in 25kg plastic bags. Store containers in a clean dry area protected from direct sunlight and extreme heat and cold. Unopened containers can be stored for 9 months. Use oldest material first.

STOPPAGE OF WORK

When work stops for short periods, simply immerse the spray gun in water, wash around the top of machine and cover remaining Sprayplaster with a thin layer of water. When work resumes, remove the excess water from the machine and commence spraying.

TERRACO offers a comprehensive range of products and services for most concrete and finishing needs. Please contact the TERRACO Technical Service Department or your local TERRACO agent for further information, samples, demonstrations and instructor services. The information given in this leaflet is based upon laboratory research, as well as extensive field work and application. All products are sold subject to standard conditions of sale which are available on request. This information is based on TERRACO’s present state of knowledge and is intended to provide general information on TERRACO’s products and their methods of use. The prospective user is recommended to determine the suitability of TERRACO’s suggestions and products before adopting them on a commercial scale.
