Recommended: alcohol resistant foam, CO2, powder, water spray mist.

Fire and Explosion Hazards
During a fire, acrylic monomers may be generated at elevated temperatures.
If engulfed by ongoing fire do not allow fire fighting run off to enter drains or watercourses.
As in any fire wear self-contained breathing apparatus, pressure demand MSHA/NIOSH (approved or equivalent) and full protective gear.

6. ACCIDENTAL RELEASE MEASURES

Safeguards (Personnel)
Exclude all non-essential personnel. Wear appropriate personal protective equipment.

Initial Containment
Absorb spills with inert material, allow to solidify and scrape up. Do not allow to enter drains or watercourses, clean preferably with a detergent. Do not use solvents.
If the product accidentally enters, rivers, lakes, drains or sewers, the Local Authority should be contacted immediately.

11. TOXICOLOGICAL INFORMATION
There is no data available on the products themselves.

Repeated or prolonged contact may lead to removal of natural fats from the skin, resulting in non-allergic dermatitis and absorption through the skin.
The products contain small amounts of biocides, not present in quantities sufficient to induce sensitisation by skin contact, but which could elicit an allergic reaction in an already sensitised person.
Splashes in eyes may cause irritation and reversible local damage.
Ingestion may result in sore throat, abdominal pain or nausea.

12. ECOLOGICAL INFORMATION
There is no data available on the products themselves. They should not be allowed to enter drains or watercourses.
