& DAMPNES

Marblecare SR

Marblecare SR

WATER REPELLANT STAIN RESISTANT NATURAL STONE SEALER

5 SIDE PROTECTION SEALER FOR MARBLES AND NATURAL STONES AGAINST STAINING AND DAMPNESS FROM SUBSTRATE.

MarbleCare SR is a water based emulsion of silane siloxane polymers that stops contaminants rising up from the substrate to the material surface (salts, tannin, oxides etc.) and prevents the formation of streaks and/or stains on the external stone surface. To be applied before laying to prevent rising damp. To be applied on all four sides and bottom side prior to fixing on prepared surface floor.

APPLICATION:

- Mixing: Mix for 5 minutes before using.
- Apply 1 coat of Marblecare SR on the entire surface using brush or roller. Allow the material to saturate the surface for 3 -5 minutes. Remove any non-absorbed materials from the tile with a clean towel or absorbent paper.

Note: Highly porous substrates may require application of a second coat. After 2 - 4 hours of application, test the surface by applying water droplets. In case of absorption, apply a second coat.

- Allow the material to dry for 12 hours prior to fixing of stones. Consult Terraco Technical Team for compatible adhesive.

AREAS OF USE:

Excellent sealer for most natural stones such as:

- Marble
- Limestone
- Sandstone
- Granite
- Slate
- Terravertine

ADVANTAGES:

- Protects the substrate against water absorption and most stains.
- Economical and easy to use
- Does not affect the adhesion of stone on substrate.
- Can be used for interior and exterior application
- Reduces freeze/thaw damage
- Leaves a tack free natural surface
- Reduces efflorescence

TOOLS:

Brush

Roller

TECHNICAL INFORMATION:

• Specific Gravity	1.01	• Storage	12 months in original unopened container
• Colour	Milky white liquid	• Packaging	5kg and 20kg plastic pails
• Application Temperature	50°C to 40°C		
• Material Consumption	150 - 200 gm/m ² /coat depending on substrate conditions
