handymate® fast drying filler

quick drying filler for general wall repairs

handymate® fast drying filler is a lightweight ready-to-use filler for interior and exterior use. The product is specially formulated to be fast drying and is ideal for last minute repairs up to 5mm in thickness.

Handymate Fast Drying Filler will surface dry in 5-20 minutes depending on thickness and temperature. Ideal for repairing cracks and voids in plaster, gypsum board and masonry. Paintable with emulsion paint when dry.

instructions

1) Ensure surfaces and holes are clean, dry and free from dust and loose material. Prime any exposed nail / screw heads with a suitable metal primer prior to application.

2) Mix Handymate Fast Drying Filler to a smooth consistency before use.

3) Apply in layers up to 5mm per coat allowing each layer to dry before overcoating.

4) Apply final layer slightly proud of surrounding surface and sand smooth when dry.

Please note: Do not expose to rain or water until fully dry.

Clean tools with water after use. Store in a cool, dry place. Protect from frost and extremes of temperature. Check packaging for expiry date. Once opened, packs may have limited storage life.
