super lightweight filler for
interior & exterior repairs

- ✓ advanced multi-functional formula
- ✓ for difficult repairs to gypsum board, masonry, plaster, wood & more
- ✓ zero shrinkage & non-slump
- ✓ no sanding required

handymate® genius

super lightweight filler for interior & exterior repairs

handymate® genius is a ready-to-use, super lightweight high-performance filler for interior and exterior repairs where non-shrink deep filling is required.

Handymate Genius will surface dry in 30-60 minutes depending on thickness and temperature. Designed for deep one-shot repairs of up to 50mm in plaster, gypsum board, masonry and wood that is intended to be painted. Paintable with emulsion paint when dry.

instructions

1) Ensure surfaces and holes are clean, dry and free from dust and loose material. Prime any exposed nail / screw heads with a suitable metal primer prior to application.

2) Mix Handymate Genius to a smooth consistency before use.

3) Can be applied in thicknesses up to 50mm for non-shrink filling of holes and defects working from the centre of the hole outwards to avoid dragging the filler loose from the sides.

Please note: Not suitable for drilling. Handymate Genius does not require sanding and should be levelled to the desired finish while wet.

Clean tools with water after use. Store in a cool, dry place. Protect from frost and extremes of temperature. Check packaging for expiry date. Once opened, packs may have limited storage life.
