TERRACO. BUILD BETTER

For over 40 years, Terraco has been developing innovative class leading solutions for the construction Industry. Terraco truly believes in working closely with customers to help accomplish projects together. Terraco is committed to help customers in construction, build better structures and better buildings.

WE HELP YOU BUILD BETTER BECAUSE WE BELIEVE

Terraco's values of Innovation, Excellence and Life are at the core of the company's thought process. With a clear purpose of helping customers build better, Terraco continuously strives to create solutions that are innovative and sustainable.

OUR STORY SINCE 1980

Established in 1980, Terraco is a leader in formulation and production of environmentally friendly building materials across 75 countries. Since its founding, Terraco has focused on sustainability and producing only water-based, low or ultra-low VOC products that are in compliance with international standards.

**BUILD
BETTER**

WE BELIEVE IN SOLUTIONS

We believe in sustainable tailor-made solutions by working closely with customers to understand their perspectives and needs. The aim is not just problem solving but also to ensure the solutions created do not impact other aspects of the ecosystem that we live in.

Solutions:

- Exterior Insulation Finishing Systems (EIFS)
- Architectural Coatings ■ Waterproofing
- Tiling ■ Roof Coatings ■ Concrete Repair
- Flooring ■ Landscaping
- Surface Preparation & Repair

WE BELIEVE IN INNOVATIONS

We are committed to delivering continuous innovations. These innovations are spearheaded by the Terraco Technical Centre in Ireland, which coordinates the efforts of all technical personnel across the group, driving cooperation with international technology partners and conducting joint research projects. This enables us to stay one step ahead of the competition and to address future challenges.

WE BELIEVE IN SUSTAINABILITY

We are driven to build a sustainable world, with a clear commitment to future generations. 100% of our products are water-based – keeping living spaces free from harmful chemicals and emissions. Our Exterior Insulation Finishing Systems (EIFS) considerably reduce heating and cooling energy consumption. And our flooring solutions using recycled materials reduce environmental waste. We believe in sustainability through better products for a better world.

WE BELIEVE IN BUILDING FASTER

Saving of time is one of the most important aspects of sustainable, low-waste construction. By producing highly versatile products, we empower multiple industries to accelerate construction activities. Our high-performance products support efficient, dynamic modern techniques like pre-fab and modular construction to save time and costs.
